

IP Share + Fast EtherSwitch for Cable/xDSL Modem

Connect Internet and your Office/Home network

Sharing for Hi-speed Surfing

No need to apply for additional IP address or account, multi-users can share just one this device, single IP address, and one Cable/xDSL Modem for Internet surfing concurrently.

Plug & Play

Both DHCP client and server can complete the network configuration for the device self and all computers on local network automatically. Zero configuration effort is needed for users. Especially the 4 port EtherSwitch design, users can just plug the cable into the device without buying additional Hub/Switch.

Incoming Mail Indication

This product can check incoming mail for user periodically. User can power on his computer to collect and read mail until this product blinks the mail LED.
